

Homework

1. What is a wildlife challenge you have in your own yard? After reading the chapter what are some management strategies you can implement?
2. Why is proper identification of the problem species important for management?
3. Describe two short-term and two long-term management strategies for wildlife.
4. What are the advantages and disadvantages of a long-term approach?
5. How can you tell whether damage to a plant was caused by deer or by rodents?
